Quickly backup files, folders, partitions and drives Thanks to its user-friendly interface, creating a new backup job shouldn't pose any problem. The application can backup locally stored files and directories, as well as disk drives, partitions or dynamic volumes, allowing full, incremental or differential operations. AOMEI Backupper Server Features: Create an image of an entire disk, including its MBR/GPT/MBR-based partition table and all its contents Integrate a bootable rescue disk in a single image file for quick startup, supported by a free CD/DVD/USB key Backup a disk or partition, including its MBR/GPT/MBR-based partition table and all its contents Auto scheduling capabilities, allowing you to make backups in a fully automated way, as well as immediately boot from the restored image, without the need to enter a password or to confirm the operation Multiple levels of compression and file/volume splitting Separate backup jobs for a single drive, disk, partition or volume, allowing you to backup or restore it individually Generate bootable media for Linux or Windows PE deployments Detect newly created file or folder updates, while keeping track of the backup timestamps Make incremental backups, letting you skip the files that have been already backed up, allowing you to reduce the size of the resulting image Maintain strict backup consistency by maintaining a list of backup timestamps Delete backups older than a given date Backup data in the form of VHD files Create bootable rescue disks for Linux or Windows PE deployments, supported by a free CD/DVD/USB key Create a cloned disk or partition, allowing you to restore it without having to restore the entire disk Mount an image in a virtual partition, displaying the contents of the image in Windows Explorer Support up to 14GB disk images Restore partitions or entire disks, clone disks or volumes and generate bootable media Backing up important data should be done periodically or even daily, if we are talking about the business environment, in order to avoid data loss due to system failures or virus infections. Mainly intended for companies, AOMEI Backupper Server is a robust backup and recovery solution that aims to reduce server downtime and ensure data protection. Quickly backup files, folders, partitions and drives Thanks to its user-friendly interface, creating a new backup job shouldn't pose any problem. The application can backup locally stored files and directories, as well as disk drives

- Easy to use, very intuitive and fast. - The program is user friendly and is also suitable for beginner users. - With easy to understand settings and user interface, the software will not lose any user's mind. - The software is compatible with Windows 2000, Windows XP, Windows Vista, Windows 7, Windows 8, Windows 8.1, Windows 10. - The software is compatible with all version of 64-bit windows OS. - It will keep your privacy safe and offer you the newest version. - It can be used on any multi-users systems without any configuration. - Main functions: 1. Enable or disable function: enable and disable it. 2. Shrink Volume: shrink volume. 3. Goto the destination directory: path, path, path, path, path, path... etc. 4. The software will not change your system settings. 5. Set Volume attributes: Set the volume properties. 6. What's new in version 1.0.1: 1. Fixed the program's service could not be started. 2. Fixed the software could not be applied to Windows 8. 3. Fixed the compatibility with Window 7. 4. Fixed the bug which could not process when disk space is less than 100 MB. 5. Fixed the bug which could not process. 6. Fixed the bug which could not auto start at the next reboot. 7. Fixed the bug which could not process when files are not enough. 8. Fixed the bug which could not work in administrator account. 9. Fixed the bug which could not process when files are too many. 10. Fixed the bug which could not process. 11. Fixed the bug which could not work on some specific file system. 12. Fixed the bug which could not process the specified folders in the root path. 13. Fixed the bug which could not process the specified folders in the system drive. 14. Fixed the bug which could not process when the program is not the default admin program. 15. Fixed the bug which could not process when the volume is in dynamic mounting mode. 16. Fixed the bug which could not process when the volume is in shared mode. 17. Fixed the bug which could not process when the volume is in the shared mode and the new share name contains the exclamation point. 18. Fixed the bug which could not process when the volume is in the shared mode and the volume 77a5ca646e

All kinds of data can be backed up, including files, folders, disks, partitions and drives! - Quickly backup files, folders, partitions and drives - Create image backups for CDs, DVDs and USB drives - Backup to a network share - Create a bootable media drive - Backup to FTP, SFTP, WebDAV, Amazon S3, Google Cloud Storage and multiple other cloud services - Schedule backups - Compress backups with a wide variety of settings - Edit backups - Protect backups with a password - Split backups into multiple pieces - Create emergency disk images - Import and export backups from/to CSV - Burn backups to CDs/DVDs/USB drives - Verify backups to ensure the integrity of the backup file - Mount images to a virtual disk to easily browse it in Windows Explorer - Merge multiple backups into a single backup - Burn image backups to CDs/DVDs/USB drives - Check backup integrity and create bootable rescue disks - Back up to ZIP, TAR and 7z archives, as well as to databases and databases tables

Introduction: AOMEI Backupper Server is a robust backup and recovery solution that aims to reduce server downtime and ensure data protection. The application comes with many functions for data backup and recovery. This software can protect your data from unexpected disasters and crashes.

AOMEI Backupper Server Description: 1. Backup your important data and directories. 2. The best way to save your time. 3. Create image backups of CDs, DVDs, and USB drives. 4. Create image backups from FTP, SFTP, WebDAV, Amazon S3, Google Cloud Storage and multiple other cloud services. 5. Burn image backups to CDs/DVDs/USB drives. 6. Create emergency disk images. 7. Mount image backups to a virtual partition to easily browse it in Windows Explorer. 8. Check backup integrity and generate bootable rescue disks. 9. It supports the most common image formats: ISO, BIN, IMG, VHD, DMG, CDIS, etc. 10. Automatically locate the backup file in Windows Explorer. 11. Can be used to back up local files and remote file/folder. 12. Automatic backups and restores. 13. Safe backups of computer folders with version control and scheduling. 14. Create image backups with multiple slices. 15. Support multiple backup intervals. 16. Smart

What's New In AOMEI Backupper Server?

Description: If your PC isn't able to automatically start up or shutdown Windows at a convenient time, you can easily create and schedule these events with AOMEI Backupper Server. This backup program will allow you to protect your PC and all its data, even if it is damaged or lost. With this program, you can back up your files, folders, and partitions without any problems, even if you have an insufficient space on your hard drive. All you have to do is select a backup target – you can choose between removable storage devices, drives, CDs, DVDs, USB flash drives, the recovery drive included in this package, and even an ISO image. To protect your files and folders, the program will run a backup, encrypt your data, and compress it, so that it takes up less space and runs faster. Backup will be effective on any version of Windows, no matter whether it is Windows XP, Windows Vista, Windows 7, Windows 8, or Windows 10. Backing up your data will prevent it from being lost in case of a system failure, virus attack, hard drive failure, or other disaster, and you can also use the program to clone partitions, or a disk drive, allowing you to restore them in a quick, hassle-free manner.

Comments (1) 1/14/2014 8:22:14 PM Suggestions on which level of encryption should be used (0) 3/26/2015 11:42:04 AM AOMEI Backupper Server is an efficient tool to protect data on a computer system and the operating system to which it belongs. The software provides useful features, such as file and folder protection, incremental backup, and roll-back functionality. If you find that a partition or a drive is not protected with a password or in any other way, you can back it up. After that, you can restore the partition or the drive to the original state with its password. In addition, you can create a bootable CD/DVD disk image using AOMEI Backupper Server, which can be used as a rescue disk to fix an operating system or save its settings when it fails to start up. AOMEI Backupper Server includes free trial versions and free software trials. The free versions allow you to try out the software and evaluate its features. The paid software allows you to backup and restore a disk or partition, which means you will be able to create backup images of various systems, such as Windows and Linux operating systems, as well as partition, drive, or USB devices, without doing a full backup. AOMEI Backupper Server supports the Windows and Linux operating systems. The software can create bootable ISO images, which is a type of ISO file that can be used to create bootable disk or USB drive. AOMEI Backupper Server allows you to perform incremental and differential backups

System Requirements:

Minimum: OS: Windows XP SP3, Windows Vista SP2, Windows 7 SP1, Windows 8 Processor: Intel Core i5-2500K @ 3.3GHz or AMD equivalent. Memory: 4GB RAM Graphics: Nvidia GeForce GTX 560 @ 1GB or AMD equivalent DirectX: Version 9.0c Network: Broadband Internet connection Recommended: Processor: Intel Core
