2.2: New functionality Autodesk 3D Architect software has been reworked with new designs and new tools. Autodesk 3D Architect 2015 contains an updated 3D wireframe modeler, a full-featured 2D drafting tool, and a new interface. The Wireframe Modeler helps you to create quick, accurate, and consistent 2D designs. Use the detail-oriented 2D drafting tool to draw more in-depth, precise 2D drawings that are better for communicating with others. The new design interface is an intuitive, drag-and-drop workspace for working with your 2D designs. New tools Autodesk 3D Architect 2015 has a new 3D modeler and 2D drafting tool. The 3D modeler is a complete solution for creating 3D models that accurately capture the geometry, dimensions, and views of your designs. The new 3D wireframe modeler enables you to create comprehensive 3D models quickly and easily. 3D modeler The 3D wireframe modeler helps you to create more accurate 3D models. With the improved wireframe technology, the 3D modeler gives you more control over your models and greatly improves your accuracy. When you import a 2D drawing into the 3D wireframe modeler, it automatically creates the 3D model based on the 2D geometry. It is also an intuitive workspace that enables you to work with your 3D models quickly and easily. New 2D drafting tool The 2D drafting tool has a powerful set of features that let you create precise and accurate 2D drawings. The 2D drafting tool enables you to draw lines and curves, as well as create intelligent text and symbols. It also provides a clear, consistent workflow that helps you work more efficiently. New interface The new design interface is an intuitive, drag-and-drop workspace for working with your 2D designs. Use the new design workspace to view and edit your 2D models. It lets you modify 2D models quickly and easily. See also Autodesk Fusion 360, another software package from the same company
