
PixCalc

PixCalc [2022]

The PixCalc app comes with a straightforward setup process that won't require one to spend hours struggling with setup requirements. You can save the app as your own toolbars and thus have it as a constant companion on your PC for future usage. The app lets you choose between the pixel and the inch format, so that you can convert from one resolution to the other without having to manually adjust the results. You can convert pixels, inches and centimeters, and you can enter the values in either the native or the scientific system. Determine image resolution in inches by dragging directly onto the interface You can drag a picture directly onto the apps' interface, and the image will be automatically converted into the desired measurement. Auto Copy Result to Clipboard The result will be placed into the Clipboard, where you can send it to another program PixCalc key features: • Choose any resolution, from pixels to inches or centimeters • Easy to use • Includes value copy-to-clipboard option • Includes command line setup hints • Supports all PC operating systems • You can choose between "Ctrl + C" and "Ctrl + V" for copying data. How To Use PixCalc: • Click the "Bring to front" button on the taskbar, or press the ALT key and click on the app's icon on the taskbar. • Click "Bring to front" and the app will be displayed on the screen. • Click the PixCalc app's icon and click on the "Add to Toolbar..." button on the interface. • A dialog will appear asking you if you want to save the app to the same location where all your other apps are saved. Click "Yes" or "No". • Click "OK" and PixCalc will be saved to the chosen location as a.exe file. • Now that the app is saved, you can exit out of the Save dialog by clicking "OK". • Once you have opened PixCalc, double-click the PixCalc icon on your taskbar to launch the app. • Click the "PixCalc" button to bring up the app's interface. • Click the "Command Line" button to open the Command Line Window. • Type one or more sets of numbers separated by commas (e.g. 5, 10) in the command line window. • Click "Enter" or press "Enter" to specify the

PixCalc Free
