Comes with a small, yet stylish interface that you can adjust between a light and a dark theme. As far as the functionality is concerned, you can select the desired location, access the connect button - or double-click the server - and the application provides you with an encrypted connection using the new IP and location automatically. Therefore, it is always important to use a VPN service that provides a stable connection. In this case, the VPNSecure software does the trick. Ensures you

---

bypass regional restrictions  
It is worth mentioning that the program displays all available connections as well as the recently used one. Therefore, next time you need to establish a VPN connection, you can find it easier, an option that is especially useful if you regularly travel to a country or region known for its online content restrictions. On the other hand, it would be nice if the app provided some suggestions on the server to connect to by accounting for your location and needs. In addition, it would be great if the program came with a

---

quick button that allowed you to enable and disable the service. A manageable and efficient VPN service Irrespective of whether you are trying to watch videos unavailable in your location due to copyright law or other restrictions or you just grew tired of Google's practices of storing each and every request for information you make, VPNSecure could lend you a hand. The link above will take you to the developer's website which provides more details about the program. With the popularity of the internet growing all the time, more and more people

---

have started to understand the concept of security in the digital age. While it is necessary to be mindful of the security of one's computer or mobile device, there are far more threats to consider. Whether it is a smart device or a simple smartphone, any of them can be hacked or attacked by a virus. However, it is not impossible to prevent such attacks from happening and protect your device against them. One of the ways you can do this is by using a virtual private network (VPN). VPN Secure is an application that is both versatile and easy to use.

---

Not only can it be used to protect your device from viruses and hacking attacks, but it can also help you to access Wi-Fi networks, bypass regional restrictions, and even watch video content available only in certain regions. Overall, the program is capable of providing you with more than what you expect from it. It is small in size, yet simple to use. Key Features:  
Provides

#### **What's New In?**

A VPN helps you to surf anonymously, bypass all sorts of limitations, and

---

ensure that you can access all the websites and content that you want. If you use a VPN, then your information is kept away from prying eyes and you can keep your identity private. This application, available for both Android and IOS, is easy to use and its interface is intuitive and straightforward. You can access a specific VPN server in just a few seconds and, if you want, you can use up to five servers simultaneously. The application gives you the possibility to connect to a VPN server in different locations. If you are used

---

to browsing in the United States and you want to access to a VPN server located in Russia, the app will do its job very well. In addition, you will find a special feature that allows you to access the sites that you want without having to type your password and your session will last longer. It is worth mentioning that you can also browse the Internet through an IP address, which can be very useful if you are using a VPN service for the first time and you want to test how it works. In addition, the app provides detailed information about each location, IP and

---

connection status. VPNSecure allows you to choose from a list of the most popular free VPN services and we recommend that you choose a VPN server from a country with an unrestricted Internet access. If you are using the app for your personal use, then make sure that you select a free server. The application can also provide you with a quick list of all the services that you can connect to. For example, if you are interested in accessing Hulu and Netflix in a more professional manner, then you can use the premium servers. What's New

---

in Version 7.4.12 (22): -  
Fixed a bug where the  
connection failed when you  
used an "always on VPN" -  
Fixed a bug where the  
connection fails when the  
VPN connection was  
interrupted after you used a  
VPN connection for the first  
time - Fixed a bug where the  
connection failed if you  
connected to a VPN using the  
"automatic connection"  
option - Fixed a bug where  
the connection was not  
recognized after an  
accidental disconnection -  
Fixed a bug where the  
connection failed when you  
used a VPN server that was  
in an unavailable state -

---

Fixed a bug where the connection failed when you opened the connection screen using a device - Fixed a bug where the connection fails when you use a VPN connection with an invalid security certificate
