What's new in Elden Ring:

Today, I want to introduce a new *Arcane King Online*, which is based on the PlayStation®4 and is scheduled for release in October 2015. This new product combines the online elements that gamers have been waiting for with the story so sought after by fans, bringing a new experience with a heightened character feeling to *Arcane King Online.*

Of course, in addition to having online play, the game will also have a large open world in the Lands Between, where you can freely explore a vast world where unexpected and overwhelming threats await. In other words, game with a high sense of immersion. And, we're not just talking about the main story; it will be worth your while to keep exploring around the world to find items, skills, and hidden items that are hidden away.

Now, let's talk about the game's online system. Even though *Arcane King Online* is a fantasy RPG, it also enjoys a multiplayer system found in many RPGs. It will allow you to directly connect with other players and travel together. In addition, you'll be able to enjoy and interact with the other players wherever you happen to be, as well as where they happen to be. And that doesn't mean that the game won't be having a traditional online mode. Rather, what you experience will be the ongoing flow of events in all corners of the Lands Between.

To that end, in conjunction with the online system, we've combined two elements. One is a party you created while single-player, and another is the online party you can create, in order to enjoy the intense battle scene with even more players.

By joining this party, you will be able to raise a party with up to four players. And in our experience, no matter how large the party is, the feeling of the players involved in the party is greatly increased.

Moreover, in *Arcane King Online*, each character has his or her

own personality, and we feel that these personalities help you enjoy the online battle much more.

In addition, while the other party members will act as part of your party, each player who joins the party is also brought in as another computer opponent. Thanks to this, you won't be running into them

Protection against functional and spatial degradations of adriamycin-loaded silk fibroin. Using adriamycin (ADR) as a model chemotherapeutic agent, a silk fibroin hydrogel conjugated with low-molecular-weight silicic acid (F-SiO2-gel-ADR) was prepared by incorporation of a small amount of silicic acid into the silk fibroin. In the F-SiO2-gel-ADR solution, the silicic acid was crosslinked into the silk fibroin to provide a 3-dimensional polymer network in silk fibroin hydrogel as the molecular support for ADR. The characterizations of F-SiO2-gel-ADR were revealed by scanning electron microscopy, fourier transform infrared spectrometry, X-ray photoelectron spectrometry and swelling behavior. The release behavior of ADR from F-SiO2-gel-ADR showed a sustained manner. In vitro cytotoxicity of F-SiO2-gel-ADR on HeLa cells demonstrated that F-SiO2-gel-ADR could improve the biocompatibility and therapeutic effectiveness for cancer treatment. In vivo antitumor effect of F-SiO2-gel-ADR was evaluated by treating subcutaneous HeLa tumor-bearing mice. The F-SiO2-gel-ADR remarkably suppressed the tumor growth and showed much better efficiency than the ADR solution. The results reveal that F-SiO2-gel-ADR can be promising for effectively improving the biocompatibility and therapeutic effectiveness for cancer treatment.Q: Live HTML5 Video Sampling on the server I am trying to allow users to upload a video and then show them how long it will take to view without having to download it.
